RELAY CODING

Pass the baton to success. Master the art of relay coding and bring your team to the finish line!

- A team of three members works together to complete programming tasks.
- The goal is to complete all tasks as quickly as possible, with each person working on the task before passing the baton to the next team member.  
- The maximum time limit is 1 hour; for every 10 minutes, the coder will change.
- If none of the teams complete all tasks within the allotted time, the winners will be determined based on the number of test cases passed by the team.
- If two teams complete it at the same time, the efficiency of the code will be taken into account to decide the winner.
- Participants are not allowed to use mobile or any other external resources during the competition.

WHO'S THE BOSS

Welcome to the ultimate coder's paradise, where time becomes your ultimate enemy. Code against time to solve the maximum number of problems to become the BOSS.

- This will be a solo event.
- Total time will be 40 minutes.
- Participants who solve the maximum number of problems will be crowned as the winner.
- If there is a tie, the time complexity of the last program will be considered for tie breaker.
- Any language can be used to solve the problems.
- Participants are not allowed to use mobile or any other external resources during the competition.
